CAREER OBJECTIVE

Final-year B.Tech (CSE) student passionate about Data Science, Machine Learning, and deriving actionable insights from data. Proficient in Python, SQL, and BI tools with hands-on internship experience in real-world data analysis. Eager to contribute to data-driven organizations through strong problem-solving, adaptability, and continuous learning.

EDUCATION

B.Tech in Computer Science and Engineering (CGPA: 8.37/10)	2023 – 2027
NS Raju Institute of Engineering and Technology, Visakhapatnam – JNTUGV (Pursuing)	
Higher Secondary Education, Class XII (76.7%)	2020 – 2022
Deeksha Jr. College, Visakhapatnam, Andhra Pradesh	
SSC, Class X (CGPA: 10/10)	2019 – 2020
Sri Chaitanya, Visakhapatnam, Andhra Pradesh	

INTERNSHIPS

Data Science Internship @ DEXTERITY	Sept 2025 – Dec 2025
- Executed end-to-end EDA on datasets to extract meaningful trends and guide model feature selection. - Developed, preprocessed, and evaluated ML models (Classification/Regression) using Python and Scikit-learn, leveraging feature engineering to maximize predictive performance.	

PROJECTS

Breast Cancer Classification Model

- Developed a binary classification pipeline using Logistic Regression to predict tumor malignancy based on 30 cellular features from digitized fine needle aspirate (FNA) images.
- Cleaned and engineered data from the scikit-learn dataset (569 samples), executing an 80/20 train-test split and performing structural and statistical data profiling using Pandas and NumPy
- Optimized model performance to achieve an impressive training accuracy of 94–96% and a test accuracy of 92–95%
- Built an end-to-end live predictive system within the workflow to ingest random test samples, generate real-time diagnoses, and validate them against ground-truth labels.
- Tech Stack:** Python, Scikit-Learn, Pandas, NumPy, Jupyter Notebook.

Nutritionist Generative AI Doctor

- Developed an AI-powered nutrition analysis application that analyzes meal images and provides detailed calorie, nutrient, and health insights.
- Integrated Google Gemini Pro Vision to identify food items from uploaded images, estimate calorie counts, and generate personalized dietary recommendations.
- Implemented macronutrient analysis, including carbohydrates, fats, fiber, and sugars, to deliver a comprehensive nutritional breakdown
- Built a user-friendly Streamlit web application with secure API key management using Python-dotenv, supporting real-time image uploads and analysis.
- Tech Stack:** Python, Google Gemini Pro Vision API, Streamlit, Pillow (PIL), Python-dotenv, VS Code.

Gold Price Prediction Model

- Built an end-to-end machine learning regression pipeline utilizing a 100-tree Random Forest Regressor to forecast gold prices (GLD).
- Preprocessed historical data and extracted features from key macroeconomic indicators (SPX, SLV, USO, EUR/USD), using correlation heatmaps to analyze multi-variable financial dependencies.
- Implemented an 80/20 train-test split, evaluated predictive accuracy using the R^2 score, and engineered custom line plots to map actual versus predicted market values.
- Tech Stack:** Python, Scikit-Learn, Pandas, Numpy, Matplotlib, Seaborn, Jupiter Notebook.

Netflix Content Strategy Insights Dashboard

- Cleaned and transformed a dataset of 8000+ Netflix content records using Power Query, handling missing values, formatting inconsistencies, and data quality issues.
- Performed EDA and text processing to analyze content distribution, ratings, duration patterns, and regional trends across multiple countries.
- Developed custom DAX measures and KPIs to evaluate content performance, including Movie vs. TV Show distribution and market-specific insights.
- Built an interactive Power BI dashboard to visualize content trends and support data-driven decision-making through executive-ready reports.
- **Tech Stack:** Power BI, Power Query, DAX, Data Cleaning, EDA, Data Visualization, ETL, Business Intelligence.

PROFICIENCIES

Languages & Frameworks	: Python (NumPy, Pandas, Matplotlib, Sklearn), Java, SQL
Core CS Skills	: Data Structures Algorithms, OOPs, Competitive Programming
Machine Learning	: Regression (Linear Regression, Multi-Linear Regression, Decision Tree, Random Forest), Classification (Logistic Regression, Decision Tree, Random Forest)
Databases & Platforms	: MySQL
BI & Reporting Tools	: Power BI(Basics), Microsoft Excel(Basics)
Soft Skills	: Problem-solving & analytical thinking, Communication, Teamwork, Time management, Adaptability, Quick learner

CERTIFICATIONS

- Python – Codesoft(2025)
- Data Science – Dexterity & NoviTech(2025)
- Artificial Intelligence – IBM SkillsBuild
- Lifelong Professional Skills – IBM SkillsBuild

ACHIEVEMENTS

- Trained as an Atal Mentor (NITI Aayog).
- 1st Prize — Poster Presentation, "Drug Free Institution" event, NSRIET (2024–25).

Languages Known : English, Telugu, Hindi

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
